A buffer solution (more precisely, pH buffer or hydrogen ion buffer) is an aqueous solution consisting of a mixture of a weak acid and its conjugate base, or vice versa. Its pH changes very little when a small amount of strong acid or base is added to it. Buffer solutions are used as a means of keeping pH at a nearly

The current warming trend is different because it is clearly the result of human activities since the mid-1800s, and is proceeding at a rate not seen over many recent millennia. 1 It is undeniable that human activities have produced the atmospheric gases that have trapped more of the Sun's energy in the Earth system. This extra energy has warmed the atmosphere, ocean, and land, and ...

The Bystander Effect – The more people who see someone in need, the less likely that person is to receive help. The parable of the Good Samaritan illustrates this effect clearly. So too do many tragic events throughout history. Researchers call it a “confusion of responsibility,” where individuals feel less responsibility for the outcome ...
